1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Priscilla L. Ferguson on March 21, 2005, whereupon it was indicated by the examiner that the reference to Quist et al'385 still read on claim 199, as amended, insofar as Quist et al requires a step of mixing cement and zeolite, and wherein the resulting mixture may comprise up to 11.7 wt% zeolite. Moreover, it was further noted that CA 2,153,372, cited of record, set forth one or more of the zeolite species recited in claim 199, also used in a cement composition and method. It was observed, however, that the specification provided several examples of a mixture of a base blend comprising 100 wt% cement and zeolite in higher concentrations, such as 15 wt % zeolite in Table 3, Batch 5. It was then agreed that if claim 199 were amended to require 15 wt % zeolite, in lieu of 5 wt%, the claim would be allowable over Quist et al, as well as all other prior art of record. It was further observed that claim 81, rejected under 35 USC 112(2), had not been amended in the manner argued by applicant; hence it will be so amended by Examiner's Amendment, i.e., the extraneous term "caused" will be deleted. It was further noted that the examiner could not find basis for new claim 123 in the specification or original disclosure, whereupon applicant referred the examiner to Table 14A, Sample 4, having a zeolite concentration of 67 wt%.

The application has been amended as follows:

Art Unit: 3672

In claim 81, line 1, the status identifier "(Currently Amended)" has been changed to --

(Original) --; in line 2 of the claim, the term "caused" has been deleted.

In claim 199, line 4, "5" has been changed to -- 15 -- .
